FLUSH DOOR NUMBERING REFERENCE

APRIL 16, 2026

Flush Door Numbering System

Timberline Custom Doors is introducing a standardized four-digit part numbering system for our flush door line. Each number in the sequence encodes a specific construction attribute — grain direction, skin construction, groove shape, and groove orientation — allowing any flush door configuration to be precisely identified at a glance.

All flush door part numbers carry the TLF prefix, denoting the door as a member of the Timberline Flush Line. The four digits that follow define the door completely within our standard matrix.

READING THE NUMBER

TLF-ABCD

A GRAIN DIRECTION	B SKIN CONSTRUCTION	C GROOVE SHAPE	D GROOVE ORIENTATION
--------------------------------	----------------------------------	-----------------------------	-----------------------------------

A | Grain Direction

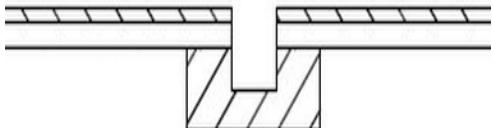

1	Vertical
2	Horizontal
3	Sketch Face (Multiple grain directions)
4	Chevron
5	Smooth for Paint

B | Skin Construction

0	Veneer with MDF Backer	
1	Solid Hardwood	
2	MDF	
3	MDO Skin for Paint	

C | Groove Shape

0	No Grooves	
1	Notch	
2	V-Groove	

D | Groove Orientation

0	No Grooves
1	Vertical
2	Horizontal
3	Sketch Face (Multiple groove directions)
4	Chevron

Custom configurations outside this structure will carry a -X suffix, consistent with the established Timberline Custom Doors designation for specialty products not captured by the standard matrix. Examples include flush doors with glass lites, double thickness perimeter staves, or other non-standard construction details.

COMMON EXAMPLES

TLF-1000	Vertical grain · Veneer/MDF backer · No grooves
TLF-2100	Horizontal grain · Solid hardwood · No grooves
TLF-1011	Vertical grain · Veneer/MDF backer · Notch · Vertical orientation
TLF-4124	Chevron grain · Solid hardwood · V-Groove · Chevron orientation
TLF-3013	Sketch face grain · Veneer/MDF backer · Notch · Sketch face orientation
TLF-5300	Smooth for paint · MDO skin for paint · No grooves
